

Creating Reasoning Routines, Building Problem-Solvers

Session 2

Developing Reasoning Across the Curriculum

www.iseemaths.com

Y1 & Y2

When the counting task has a purpose that makes sense and has significance, children's counting skills operate at a higher level of thinking.

Routines Within Interactive Teaching

Raising the internal narrative:

- Gap between question and response/discussion
- Silent examples

Mass participation:

- Form of answer before question
- Wait time 2, other perspectives

Managing discussions

Feedback

Y1 & Y2

Re-Proposing and Extending Mathematical Play

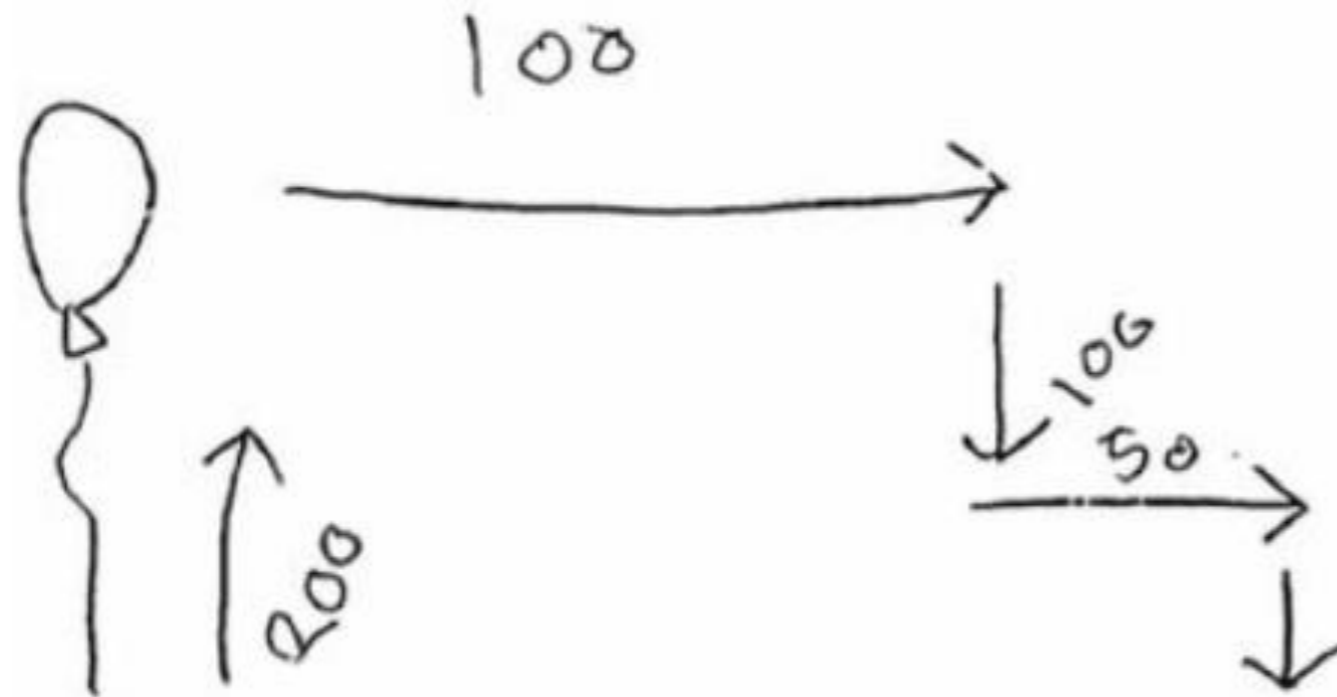

Real life moves too fast to reflect on the learning that is happening at the time.

Recreate moments, re-proposals, content control

A balloon first rose 200 meters from the ground, then moved 100 meters to the east, then dropped 100 meters. It then travelled 50 meters to the east, and finally dropped straight to the ground. How far was the balloon from its original starting place?"

Self-regulation and ownership

Number skills in and out of context

Spatial reasoning

Finger discrimination

92. In some schools, pupils were not explicitly taught how to apply the mathematics they had recently learned to mathematical problems. Their only exposure to solving mathematical problems was through answering the final few questions of a predominantly procedure-focused exercise. Often, many pupils did not reach this stage of the exercise. These pupils, therefore, had very little experience of applying mathematical methods beyond routine and established applications. Pupils in these schools were notably less confident when solving mathematical problems.

[Link](#)

When students are presented with a mathematics word problem, their first response often is to try to compute an answer, even before they have tried to understand the problem.

Expert problem solvers typically spend more time thinking about problems and trying to understand them than do novices, who tend to immediately execute a solution.

Removing Opportunities to Calculate Improves Students' Performance on Subsequent Word Problems. *Givvin and Stigler (2019)*

Rob has 4 more cherries than John.

John has 5 cherries.

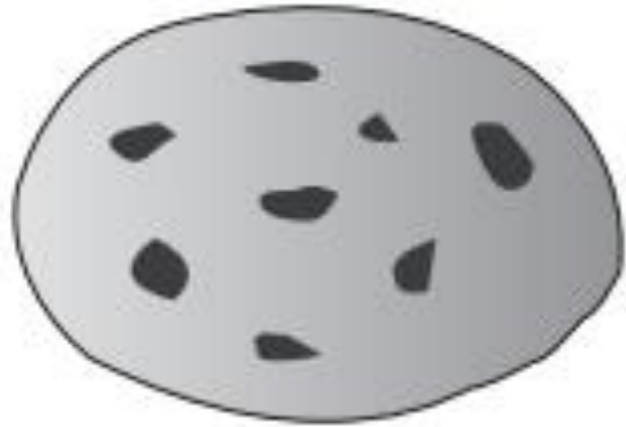

How many cherries does Rob have?

Mastery Assessment, Y1 (adapted)

Children's Task:

Which Picture?

Kate has 3 apples. Tom has 2 apples.

How many apples in total?

Which Picture?

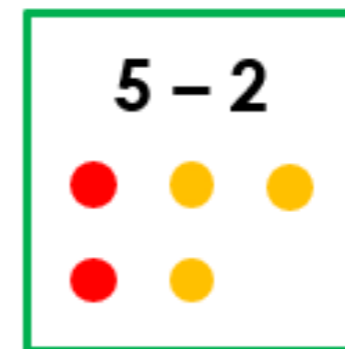

Task A

In total, Lee and Ben have 5 sweets. Lee has 2 sweets.

How many sweets does Ben have?

Which Picture?

There were 20 people on the bus.

At the bus stop,

How many people on the bus now?

There were 20 people on the bus.

At the bus stop, people got off the bus and people got on.

How many people on the bus now?

There were 20 people on the bus.

At the bus stop, people got off the bus and people got on.

How many people on the bus now?

There were 20 people on the bus.

At the bus stop, $\boxed{8}$ people got off the bus and $\boxed{6}$ people got on.

How many people on the bus now?

Explain why this DOES NOT correctly represent the question:

There were 20 people on the bus.

At the bus stop, 8 people got off the bus and 6 people got on.

How many people on the bus now?

Which Picture?

1. Dan had 10 sweets. He gave 2 sweets to Tom and 3 sweets to Raja.

How many sweets does Dan have left?

2. Holly had 10 pencil crayons.

She lost 2 pencil crayons. Then, she bought 3 more pencil crayons.

How many pencil crayons does Holly have now?

3. There were 10 people on the bus.

At the next stop, 2 people got on the bus and 3 people got off the bus.

How many people are on the bus now?

Eva has 2 bags of marbles.
She has 20 marbles altogether.

Circle the bags she has.

Eva has 2 bags of marbles.

Eva has 2 bags of marbles.
She has 10 marbles altogether.

Jen had 10 sweets.

Zara had 4 sweets.

Jen had 10 sweets.

Zara had 4 sweets.

Who has the most sweets now?

Jen had 10 sweets.

Zara had 4 sweets.

Jen gave Zara sweets.

Who has the most sweets now?

Jen had 10 sweets.

Zara had 4 sweets.

Jen gave Zara 2 sweets.

Who has the most sweets now?

1. Ben has 8 sweets. Tom had 2 sweets.

How many sweets do they have altogether?

2. Kate has 8 sweets. Joy has 2 sweets.

How many more sweets does Kate have than Joy?

3. Holly had 8 sweets. Amy had 2 sweets. Holly ate 4 sweets.

Who has the most sweets now?

4. Holly had 8 grapes. Amy had 2 grapes. Holly gave Amy 4 grapes.

Who has the most grapes now?

Task: Provide each pupil with 2p, 5p and 10p coins (real or otherwise), then ask pupils to show how to pay for:

- the drum with 2p coins
- the boat with 5p coins
- the dinosaur with 10p coins

The table shows the results of a survey which asked pupils to choose their favourite sport. Which sports were chosen by between 20 and 30 pupils?

Favourite sport	Number of pupils
netball	24
basketball	19
tennis	12
football	32
hockey	6
swimming	28
gymnastics	15

The bar chart shows how many points some pupils scored in a quiz.

- How many more points did John score than Sara?
- How many fewer points did Harry score than Saskia?
- What is the difference between Saskia's score and Paul's score?
